OUR PASSION. YOUR SUCCESS.

We don't want you to rely on luck. The highest priority for you as a serious shooter is to find a cartridge with reliable, predictable performance; if you shoot well, you get consistent hits. And if you're sloppy, it gives you the feedback immediately. The cartridge must be affordable. If price keeps you from practicing, you'll fail to do the most important thing for an aspiring shooter; to create a training routine. SK is one of the most reasonably priced quality cartridges in the market. Yet, we are constantly renewing and fine tuning our machinery to make it one of the best, in both precision and reliability – so that you know when you do things right.

Luck is nothing. Determination is everything.

SHOTS THAT HAVE TRAVELLED THROUGH TIME

In case you thought that 185 years ago people were still hunting with stone spears – well, here's news for you: that's when SK started to manufacture the best available hunting and sports ammunition. (Yes, sports were already invented!) In 1992 we merged with Lapua, to form a perfect combination of manufacturing experience and ballistic expertise. Now it's your turn to take advantage of this long trajectory.
